

Call for applications for the assignment of 1 research fellowship grant for carrying out Category B research activities, as per Article 22 of Italian Law No. 240/2010, for the Scientific Disciplinary Sector of MED/34 – Physical and Rehabilitation Medicine, at the facilities of the CIR - Integrated Research Centre and of the Departmental Faculty of Medicine and Surgery of Università Campus Bio-Medico di Roma

Call Code: ASS-RIC/08_24

Departmental Faculty	Medicine and Surgery
Research theme in English	SyDiDOa, Symptomatic Digital Drugs for Osteoarthritis
Brief description of the research in English	Osteoarthritis (OA) represents the most common chronic rheumatic disease in the world, with progressive pathological alterations of the joints and consequent motor disabilities. Correct and early treatment represents the only possible chance to contain the high socio-health impact and improve the quality of life of these patients. In recent years, digital therapies or "digital therapeutics" or "DTx" are becoming increasingly widespread, which are those technologies that offer therapeutic interventions guided by high-quality software programs. Therefore, the identification of specific digital therapeutic programs for OA would represent a clear opportunity for the prevention and treatment of this pathology and would be the first in Italy and worldwide.
Scientific Supervisor	Prof.ssa Federica Bressi
Scientific Disciplinary Sector	MED/34 – Physical and Rehabilitation Medicine
Language knowledge and skills	English C1
Date of the interview	21th February 2024, at 8:45 a.m. Remote candidates on Microsoft Teams platform
