

Call Code: ASS-RIC/11_24

Departmental Faculty	Engineering
Research theme	Civic Crowdfunding: involving citizens in funding initiatives for the urban environment
Brief description of the research	The research activity aims to analyze the phenomenon of crowdfunding to finance initiatives in urban areas. This emerging phenomenon, more precisely called Civic Crowdfunding, represents an opportunity to directly involve citizens in improving the urban environment. We need to understand even better how to fully exploit this phenomenon as it can have relevant implications for policymakers and for the entire society.
Scientific Supervisor	Dott. Francesco Cappa
Scientific Disciplinary Sector	ING-IND/35 – Business and Management Engineering, SECS-S/06 – Mathematical Methods of Economics, Finance and Actuarial Sciences
Language knowledge and skills	Written and spoken English
Date of the interview	22nd March 2024, at 6:00 p.m. Remote candidates on Microsoft Teams platform
